Step 3:

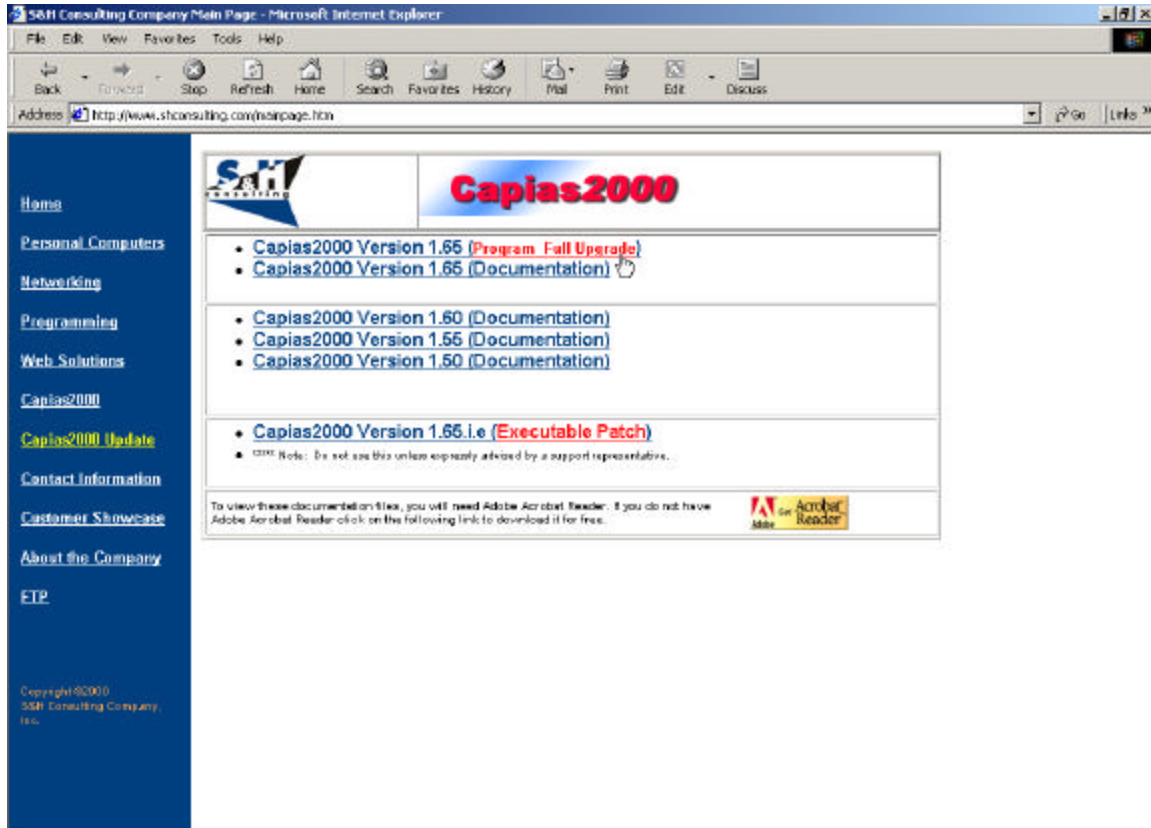

- Select the “Documentation” link and print the file for information regarding features of the latest program revision.

A screenshot of a Microsoft Internet Explorer browser window displaying the SSH Consulting website. The browser's address bar shows the URL 'http://www.sshconsulting.com/mainpage.htm'. The website has a blue sidebar on the left with navigation links: Home, Personal Computers, Networking, Programming, Web Solutions, Capias2000, Capias2000 Update, Contact Information, Customer Showcase, About the Company, and FTP. The main content area features the SSH Consulting logo and the title 'Capias2000' in red. Below the title, there are several bullet points with links: 'Capias2000 Version 1.65 (Program Full Upgrade)', 'Capias2000 Version 1.65 (Documentation)', 'Capias2000 Version 1.60 (Documentation)', 'Capias2000 Version 1.55 (Documentation)', and 'Capias2000 Version 1.50 (Documentation)'. A note below these links states: 'Note: Do not use this unless expressly advised by a support representative.' At the bottom of the content area, there is a message: 'To view these documentation files, you will need Adobe Acrobat Reader. If you do not have Adobe Acrobat Reader click on the following link to download it for free.' and an 'Adobe Acrobat Reader' logo.

Step 4:

- Select the “Full Program Upgrade” link and save the file to your local system. Please note that this may take a considerable amount of time, depending upon your internet connection speed.

Capias2000 for Windows On-Line Program Update

Step 5:

- Close your browser and locate the “CapiasPatch.exe” that you downloaded.
- Execute the “CapiasPatch.exe” and make sure to point the installation to the appropriate location. For instance, you may have a network and Capias2000 may be installed on “Y:\capwin” instead of “C:\capwin”. If you have only a single PC, the location is most likely to be “C:\capwin”.
- After processing the upgrade file, please reboot all workstations.
- After restarting all workstations, please login to Capias2000 and proceed to the “File Maintenance” menu and select “Update All File Structures”. This may take several minutes but is critical to the proper function of the latest program revisions. Note that all users must remain out of the system while this is being accomplished.
- You should now be ready to go back to work !
